

Residence

Industrial Modern

Perfect downsizer, this home accommodates every lifestyle need imaginable. The home office at the front maintains the owner's privacy, as the entry directs people straight in. There is even a bathroom connected, to ensure there is no need for their clients to enter the main living area. The large open living boasts large windows to capture the northern light, while also connecting the two separate outdoor spaces; the courtyard and alfresco. This is the perfect place to curl up in winter to enjoy a wine by the log fire. Upstairs is home to a spacious sitting room and master suite, both connecting to the spacious balcony where you can appreciate the views of the golf course & glimpses of the city.
