

# Corbusier

Contemporary  
Modern Australian

The Corbusier is a true inner city new home designed to allow plenty of light to both levels of the home and maximise the footprint on the block.

This custom designed home is for a small narrow rear garage block, its entry has a contemporary feel that leads to a unique void over the living area. Perfectly designed for low maintenance, this new home design has the perfect mix of an entertainer style home that has plenty of privacy with incredible feature screens to the front elevation. All bedrooms to the upper floor create a big open feel to the ground level.
